

Social issues

Task 1:

Consider, which social problems (e.g.: unemployment, poverty, education, lack of housing,...) exist in your country and tell your partner about them. Which social problem is currently the most pressing in your country? What are the causes?

Task 2:

Make a list together in which you compare the social problems in your countries. Are there many similarities/differences? For how long have these problems been ongoing? Have there been significant changes/developments in recent years?

Task 3:

Watch a video, e.g.: [Nearly UK's 4 million people work in poverty](#) (Dec 2016). Exchange your views about the video. Is the situation similar in your countries? How do your countries solve this problem? Where can affected people get help?
