

# It's not always easy to have a party

## Task 1:

Think about the problems or difficulties that can occur during the party planning process. Which problems have you yourselves experienced in the past? What are possible solutions / what did you do in the situations you experienced?

## Task 2:

Imagine you are planning a party together and the following problems come up:

- One of the guests has a severe nut allergy.
- Some of the guests are vegetarians and vegans.
- The place you originally rented for the party was double-booked, and you need to find a different location to host the party fast.
- You want to have a garden party, but it's raining cats and dogs.
- You forgot that the date of the party coincides with your nan's 90st birthday, and you are invited to her party.
- ...

Try to find solutions for these problems.
